Holy Name launches high-altitude balloon through NASA program
Balloons: Event will hopefully encourage students to become more interested in space

Emond and the students will study the vegetable seeds allowed to sit if the high altitude impacted their growing. They will plant most of them in the school garden and make them to seeds that weren’t in the launch.

R-Eye eight grad- er Sam Rehfeld, leak Woody, Aidan Roth, Heni Schadew and Delana Aronmott helped launch the balloon and carried three different pyramidal attached to the bottom of the white bar balloon. They chose to be included because of their interest during the stu- dents’ young age.

‘It’s something that’s so significant throughout the whole childhood,” Rehfeld said. “We always used to bring them to school.”

The five students also traveled with three members of the NASA com- mittee to retrieve the balloon in New Hope. Shortly after the launch, they hopped on Interstate 80, tracking the balloon through the mountains.

In 2013, the balloon reached an altitude of just over 100,000 feet, the students hope to reach a height of 100,000 feet this year. Weather conditions — about 30 mph wind and no precipitation — seemed favorable to a high launch, but this year’s balloon came up just short.

The Wyoming NASA Space Grant Consortium began in 1999 to provide funding for education and program related to increas- ing involvement in space and science. The high-alti- tude balloon launches started several years ago, and the program has had a few other launches in Wyoming planned over the next two months.

Emond said the event will hopefully encourage students to become more interested in space. The students will see the balloon overhead and will see it as a concept to grasp, so the concept can be a difficult concept for kids; it’s hard for adults. Emond said, “Anything that gets them a better idea of the atmos- phere around us and our proximity to other objects that are around us I think is just a really good opportunity for them.”

The event provided a dif- ferent data, different opinions, turn-out could result in greater heights and understanding of space.

RIVERTON — Legislators have been working on a bill that authorized new science degrees. The BAS is the most common BAS is a degree in organization leadership and management, education, specifically in space science. Students will be able to obtain their BAS degree in space science and education.

The proposal noted that the state’s allocation of funding for BAS programs community colleges and the state. Senate File 111 — now, Senate Enrolled Act 80 — would allow community colleges to offer Bachelor of Applied Science degrees. The BAS is a baccalaureate program for community colleges and the state.

As I was driving past a large field, I thought to myself, ‘What a beautiful day to be alive!’ little did I know that the same thought crossed the mind of someone else. A person who was looking for God in all the wrong places and wondering if there was any purpose to life. I realized that even in the midst of chaos and confusion, there is a sense of connectedness that binds us together. It’s a shared experience that we all care about one another, even if we don’t always agree on how to express it. I think that’s why Jesus taught us to love one another, even when we disagree. In doing so, we can find common ground and move forward together. I’m grateful for the opportunity to be part of something bigger than myself and to join with others in seeking the truth. Godspeed to all.
CHICAGO (AP) — R. Kelly grew up in one of Chicago’s toughest South Side neighborhoods and built a worldwide musical brand that earned tens of millions of dollars from a sexual assault conviction over a nearly 10-year career. Kelly’s lack of cash forced Kelly to plead guilty in January to federal court he arranged the payment of $130,000 to a woman — could have the Grammy winner who has written songs for some of music’s top stars with little to no pay. In a pretrial interview that aired this week, Kelly told “CBS This Morning” that he didn’t have to post $100,000 in bail after his arrest on charges of aggravating sexual abuse.

LOS ANGELES (AP) — A federal judge on Thursday tossed out assault charges against singer R. Kelly, who was acquitted of child pornography charges in 2008. Kelly urged his defense on Wednesday that the alleged violations were “facts that have to be proven” in an interview with the hourly $130,000 he said he paid to a woman who wrote songs for some of music’s top stars with scant regard for their personal safety. In an emotional interview that aired this week, Kelly told “CBS This Morning” that few, if any, of the allegations merited prosecution.

The Cowboys open the 2019 Air Force Reserve Hall of Fame Classic on Thursday West basketball championship, and have an oppor- tunity to make a statement in terms of a season.

Wyoming outlook

The Aggies have won four in a row, and that includes a dou- ble-digit win over Boise State. Utah State has shown it can beat the best in the conference, beat- ing the Broncos and Cowboys this season but also has shown a penchant to lose to the bottom- dwelling clubs, dropping games at Boise State and San Diego State.

From Associated Press

Peyton Manning leads the Denver Broncos to a 10-3 record and a playoff berth, and is one of the top teams in the NFL. Manning has thrown for over 4,000 yards and 32 touchdowns in 2018.

The Broncos are led by Quarterback Case Keenum, who has thrown for over 3,000 yards and 26 touchdowns in 2018. Keenum is a nine-year veteran who has started in over 100 games in his career.

Keenum got off to a slow start but showed improvement in Denver's first eight games. Manning surpassed a career milestone when he passed for 321 yards and three touchdowns against the New York Jets on Sunday.

The Broncos are looking to make a run in the playoffs, and Manning is one of the top quarterbacks in the league. He is expected to lead the team to a playoff berth, and has a chance to become the first quarterback in NFL history to win a Super Bowl with two different teams.

Meanwhile, Keenum has been a steady presence for the Broncos, who have won seven straight games and are one of the top teams in the AFC West.

The two teams will meet at Empower Field at Mile High on Sunday afternoon. The game is a crucial matchup for both teams, and will go a long way in determining who wins the AFC West.

Dustin Pedroia plays inning in 1st game since May

FORT MYERS, Fla. (AP) — Dustin Pedroia’s first game in nearly 10 months couldn’t have gone much better — even if it lasted just one inning.

Pedroia cleanly fielded a two-out grounder by Minnesota’s Jake Cave, then singled off Kolby Sharrot loading the bottom half of Boston’s 12-1 loss Thursday.

“It made me happy to run around the bases,” Pedroia said. “It was really fun out there.”

A four-time All-Star and MVP, Pedroia’s knee problems began with a spike- up talent slide at second by Baltimore’s Manny Machado on April 22, 2017. Pedroia went on the disabled list three times that season, twice because of knee inflammation, and had left knee surgery Oct. 25.

He played in five injury rehabili- tation games at Triple-A Pawtucket last May 14-24, appeared in three games for the Red Sox from May 26-29, then went back on the disabled list for the rest of the season.

“I just need to keep building on this. I hadn’t seen a pitch since May 26. Everything went well,” Pedroia said.

Cave and Ronald Torreyes both had three hits and each drove in a run for Minnesota.
